

SINCE 2008

**MIDDLE EAST
GROUP**

Middle East Group has been actively contributing to the growth and infrastructure development of the region for the past 16 years, playing a vital role in the region's advancement.

Middle East Group is a distinguished Engineering and Project Management organization renowned for its expertise in water and wastewater treatment.

We specialize as a contractor for large-scale water EPC projects and excelled as an electromechanical contractor for pumping station projects. Our commitment is to deliver comprehensive solutions meticulously tailored to meet the unique requirements of each project, ensuring successful outcomes and client satisfaction

OUR SERVICES

WATER & WASTEWATER TREATMENT

MEP CONTRACTOR FOR PUMPING STATION WORKS

SPECIALIZED EPC CONTRACTOR FOR INFRASTRUCTURE WORKS

We have developed a competitive infrastructure within the organization, adopting innovative technologies and solutions, and over the years we have developed a strong specialisation in engineering and project management.

We achieve our goals by adopting the highest qualitative and ethical standards recognised at an international level and we apply the acquired know-how to build a better future.

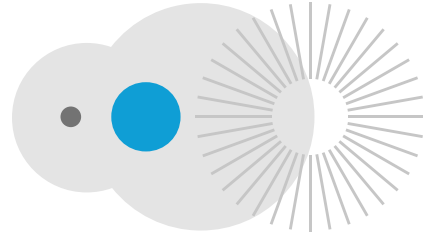

WATER & WASTEWATER TREATMENT

We provide complete water management services for municipal, commercial, industrial, oil & gas and various other industries, and serve reliable, easy to operate and most cost-effective solutions for your water treatment applications. We design compact package treatment plants on a skid mounted or tailor-made containerized package. All our package water & wastewater plants are easy to install and operate.

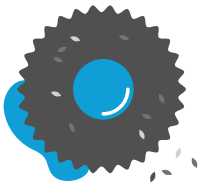

SOLUTIONS

- Water filtration systems
- Water softeners
- Seawater reverse Osmos plants (SWRO, BWRO)
- Package Sewage treatment plants (MBBR, MBR)
- Grey water treatment plants
- TSE polishing plant. (UF+RO)
- Ultrafiltration systems.
- Wastewater Treatment Plants
- Effluent treatment plants
- Water disinfection system (Dosing, UV, Ozonation system)

MEFT PACKAGE PLANTS

MEFT PACKAGE PLANTS

Tailor made package plant for domestic and municipal sewage treatment applications.

FEATURES

- / Containerized, Modular design
- / Small foot print
- / Prefabricated design in MSEP/ MSRL tanks or in refurbished containers
- / Fully automatic operation
- / Movable type, suitable for underground installation
- / Treated water can be used for toilet flushing and irrigation

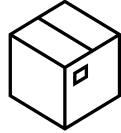

APPLICATIONS

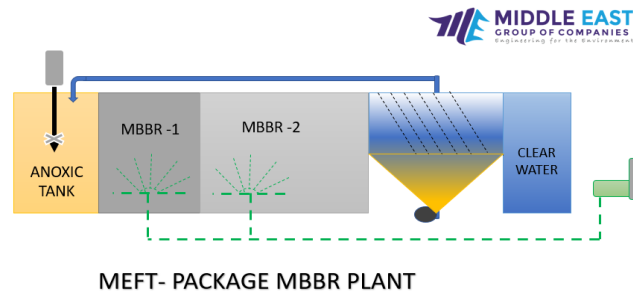

- / Residential complexes
- / Hospitals
- / School & institutions
- / Hotels & Resorts
- / Industries
- / Municipal waste water tr

MEFT PACKAGE MBBR STP

MEFT customized package MBBR plants are designed for highly effective biological treatment process based on combination of conventional activated sludge process and biofilm media. We use high performance biocarriers media suitable for better bacteria culture condition with low density and high surface area.

MEP CONTRACTING PUMPING STATION WORK

We are a leading infrastructure MEP contractor in the UAE, known for our strong working relationship with major authorities and extensive experience collaborating with key clients, developers, and consultants across the region. Our capabilities cover all spectrum from detailed design, value engineering and expertise in supply management, testing and commissioning. our specialization in handling various types of pumping stations works and ensuring each project meets the highest standards of quality and efficiency demanded by our clients and authorities are remarkable.

SOLUTIONS

- Sewage Pumping Station
- Lifting stations
- Storm water pumping station
- Fire Water Pumping Station
- Irrigation Pumping Station
- Potable Water Pumping Station

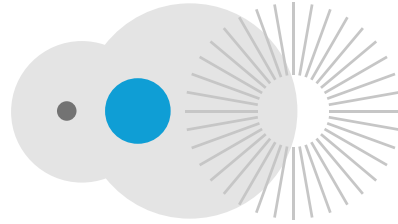

SPECIALIZED EPC CONTRACTING INFRASTRUCTURE PROJECTS

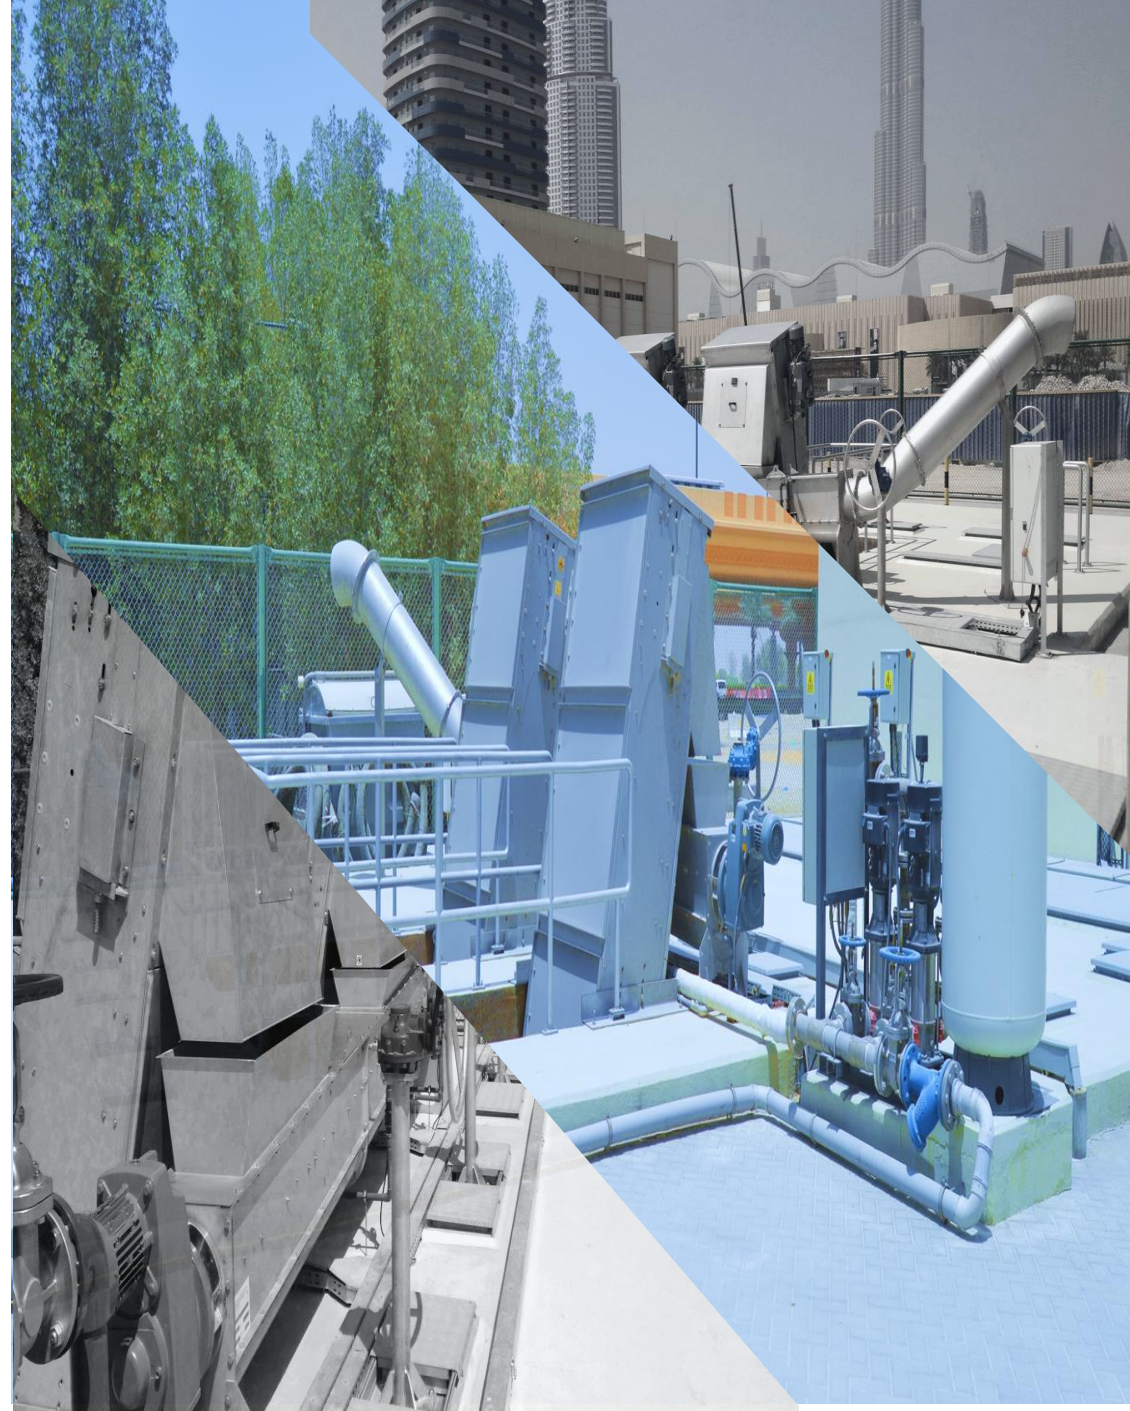

Endured from our specialized expertise in water treatment and knowledge on different water treatment equipment, Experience from pumping station works, we specialized in installing, testing, and commissioning different water treatment systems & Equipment's , which are customized for large-scale EPC projects. These include Municipal Sewage treatment plants, Desalination plants, Water treatment plants, and more. Our comprehensive services include project management and engineering, supported by dedicated onsite project management team to guarantee smooth execution and successful project outcomes.

INSTALLATION EXPERTISE

- Dissolved Air floatation units (DAF)
- Clarifiers
- Air blowers with aeration system including diffusers
- Pumps (Submersible, Vertical Multistage, Screw Pumps)
- Screens
- Penstock.
- Combi units.
- Dosing systems
- Automatic polymer Preparation units.
- Sludge Dewatering units (Centrifuge, Screw Press)
- Disc filters
- Odor control systems

IN HOUSE FABRICATION & ASSEMBLY

We have **ISO 9001:2015** quality management system certified facility in UAE. All our fabricators, welders and fitters are highly qualified with experience and expertise in handling all sort of materials like Duplex steel, Stainless Steel , Mild Steel and carbon steel.
